

### A BIT OF CONTEXT

COVID-19 made us realized that severe crisis can dramatically restrict physical movement while simultaneously reducing access to essential resources and services by disrupting supply chains, closing facilities & markets

Smallholder farmers are one of the first to be impacted

### THE RESILINK PROJECT

PRIMA: Partnership for Research and Innovation in the Mediterranean

2021 CALL in Agrofood chain thematic

### https://prima-med.org/

Topic 2.3.1 Increasing the resilience of small-scale farms to global challenges and COVID-like crisis by using adapted technologies, smart agri-food supply chain and crisis management tools

INCREASING RESILIENCE OF SMALLHOLDERS WITH MULTI-PLATFORMS LINKING LOCALIZED RESOURCE SHARING

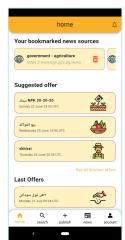

### WHAT RESILINK IS DOING?

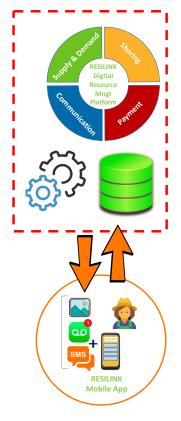

Identify needs & expectations when providing Digital Tools for crisis situations

Develop the core components of a Digital

Platform to share local resources

Develop a demonstrator with a mobile application for validation in Living-Labs

### RESICOLINK

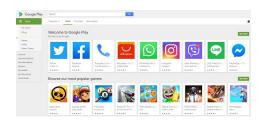

### YET ANOTHER DIGITAL PLATFORM?

Already a lot of digital platforms! They are already key element of the digital transformation

But each new digital platform or app try to create its own community!

Sharing between communities is not the objective. Competition and isolation are preferred!

### RESI**COLIN**

### NO "ONE APP FITS ALL"

Competition → Isolation → Fragmented ecosystems

A platform-of-platforms approach will promote a much wider and appealing ecosystem

→ Platforms for specific agricultural sectors

→ Discover resources/services from other platforms

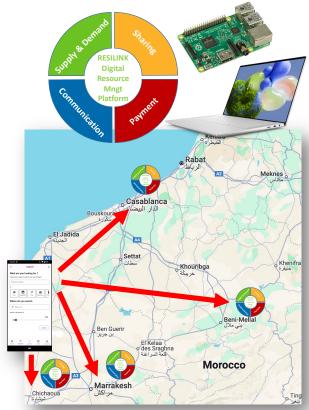

→ No isolation

# THE INNOVATIONS BEHIND THE APP!

Develop lightweight Digital Platforms that can be quickly & locally deployed

Digital Platforms can be incrementally deployed for various geographical areas

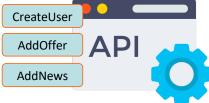

Open API will enable Platform-of-Platforms

approach to extend the ecosystem

## 2nd Symposium on Mediterranean Fruit & Vegetables: Hub for Innovation & 10th Edition of the International Research School, Ibnou Zohr University TRADITIONAL DIGITAL PLATFORMS vs LIGHTWEIGHT SERVERS

Develop lightweight Digital Platforms that can be quickly & locally deployed

Digital Platforms can be incrementally deployed for various geographical areas

Open API will enable Platform-of-Platforms approach to extend the ecosystem

**RESICOLINK** 

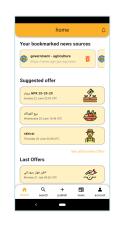

FRONT-END

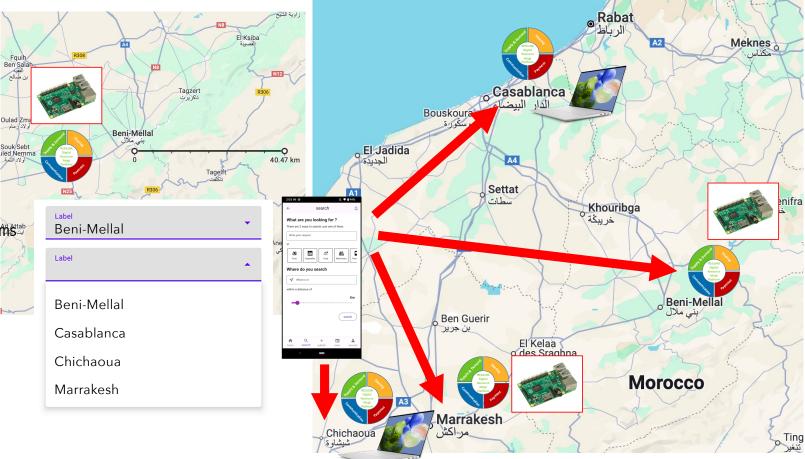

## 2nd Symposium on Mediterranean Fruit & Vegetables: Hub for Innovation & 10th Edition of the International Research School, Ibnou Zohr University RESICULINK INCREMENTAL DEPLOYMENT OF SERVERS ACCORDING TO NEW NEEDS

Develop lightweight Digital Platforms that can be quickly & locally deployed

Digital Platforms can be incrementally deployed for various geographical areas

Open API will enable Platform-of-Platforms approach to extend the ecosystem

Kenitra

# QUICK DEVELOPMENT OF NEW PLATFORMS, STIMULATING LOCAL INNOVATIONS

Fast development of new

applications by local entrepreneurs

Develop lightweight Digital Platforms that can be quickly & locally deployed

Digital Platforms can be incrementally deployed for various geographical areas

Open API will enable Platform-of-Platforms approach to extend the ecosystem

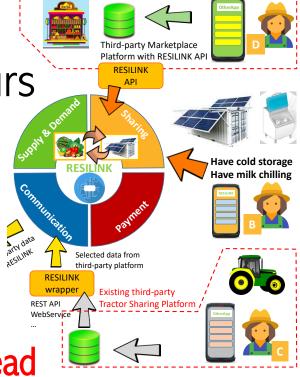

New applications will bring new functionalities for

specialized needs

Open API = Collaboration instead of Isolation!

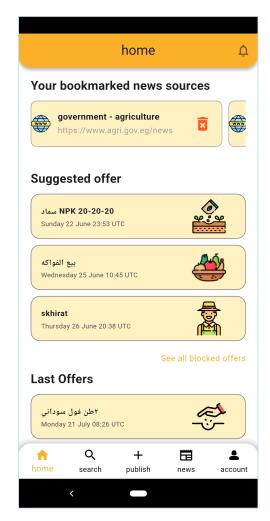

### THE RESILINK DEMONSTRATOR

The RESILINK mobile application allows farmers to publish & search for resources

It connects smallholders to sharing opportunities, local distribution channels

Provides quick links to news & alarms from governmental agencies

**RESICOLINK** 

### INTERVIEWS, TESTS & LIVING-LABS

RESILINK received a lot of support from smallholder farmers!

**WE WANT TO THANK FARMERS & STAKEHOLDERS** 

Furonean Union

### **ALL SOFTWARE ARE OPEN SOURCE!**

The BACK-END server is open source

The demonstrator mobile app FRONT-END developed with Flutter is open source

Documentations are available to install & deploy BACK-END

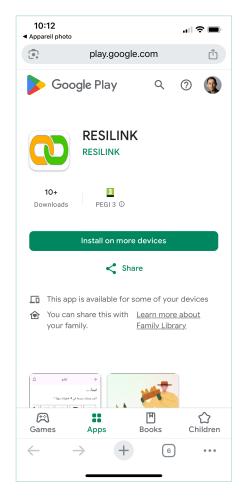

The demonstrator mobile app is an example of mobile app FRONT-END that can further be adapted & customized

### RESILINK MOBILE APP ON GOOGLE PLAY

INSTALL THE APP

CREATE AN ACCOUNT

AND START PUBLISHING OFFERS

TO CREATE A COMMUNITY

FLASH TO INSTALL

This project is part of the PRIMA
Programme supported by the
European Union

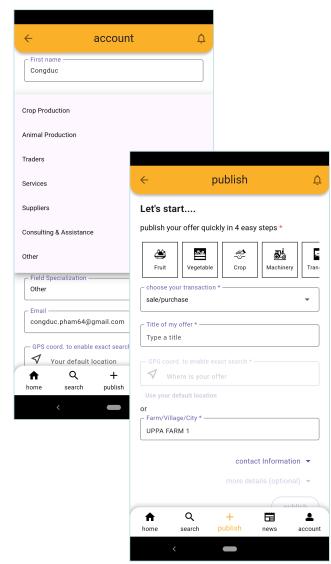

### **ACT AS A FARMER!**

Select a country

Act as a farmer and indicate your main activity

Then publish offers and search for offers according to your activity

Prof. Congduc Phan http://www.univ-pau.fr/~cpha

### PROVIDE FEEDBACK

Fill in the feedback form in paper version (see .pdf link)

Or, use the Google Form to fill it online:
